# PROBLEM STATEMENT

- Improve hiring, employee experience, engagement, retention, and business outcomes.

- Make data-driven decisions:**

- People analytics takes out the guesswork and helps you make evidence-based decisions about your workforce. Using employee data analysis, you can surface insights into areas such as talent acquisition, performance management, employee engagement, and retention.

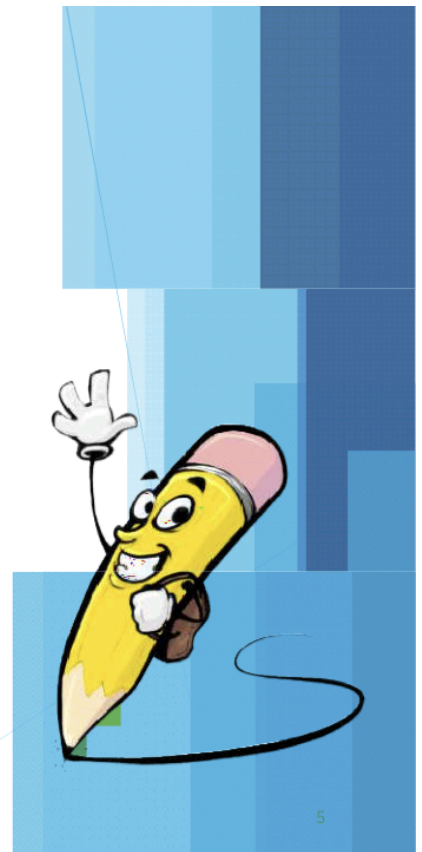

# PROJECT OVERVIEW

- **Employee performance analysis** is a formal and productive procedure to measure an employee's work and results based on their job responsibilities

1. Companies use performance appraisals to discover which employees have contributed the most to the company's growth, review progress, and reward high-achieving workers

2. An employee performance review is an evaluation where managers, peers, or other stakeholders assess a team member's job performance over time

3. Employers use appraisal forms to measure their employees' performance and encourage improvement4.
